(54) Title: MAGNETIC ENRICHMENT METHOD, A REACTOR UNIT FOR MICRO PARTICLES AND A MAGNET UNIT

(57) Abstract: Magnetic enrichment method, wherein
the desired biological component is collected from a so-
lution, which component is thereafter enriched in a liquid
in such a manner that by means of the micro particles at-
tached to the magnet or attached by means of at least one
magnet at least one biological component is collected in
a closed reactor vessel. Thereafter at least one biological
component is enriched in such a manner that the desired
component is released to the solution. The reactor unit
is a closed vessel, wherein the prevailing conditions are
controllable. The shape and the location of the magnet
unit in the reactor unit are adjusted in a preferable man-
ner to collect the desired biological component.
